COMPLIANCE WITH CHAPTER 427, F.S.

Review the CTC monitoring of its transportation operator contracts to ensure compliance with 427.0155(3), F.S.
“Review all transportation operator contracts annually.” See TDSP, Pages 38-41; Appendix E

WHAT TYPE OF MONITORING DOES THE CTC PERFORM ON ITS OPERATOR(S) AND HOW OFTEN IS IT CONDUCTED?

1. Contractors are required to provide CTC with updated Driver Rosters by the twentieth (20) calendar day of each month. Roster shall indicate driver's name, date of hire, training dates, last Drug and Alcohol test, Motor Vehicle Record (MVR) review date and date of latest criminal record check. Contractors are required to maintain updated Driver Rosters in the Computerized Trip Management System (CTMS).

2. Contractors must provide CTC with evidence all drivers have completed the training program offered by CTC prior to any driver providing service and must attend a refresher class or repeat new driver training a minimum of once every two (2) years. Classes include Defensive Driver, Passenger Assistance Technique, Responding to Client Incidents, SUNsational Service and other training required by Provider.

3. Training information shall be included in the monthly operating summary package. Additionally, drivers are required to participate in a driver training program developed by CTC. Contractors must require all personnel providing transportation to possess the following, which shall be filed with CTC prior to personnel providing paratransit service: current, valid Broward County Chauffeur's Registration in accordance with requirements of Chapter 22-1/2, Broward County Code of Ordinances. Provider ADEPT driver roster is submitted weekly to Broward County Risk Management department. They verify daily for driver license violations which would require driver removal from operating a vehicle. Driver Training Program shall include a minimum of eighty (80) hours of training prior to driving a service vehicle. This shall include the following: Passenger Assistance Technique; Defensive Driver; Responding to Client Incidents; Vehicle breakdown, Vehicle and/or Passenger Accidents; Vehicle Orientation; Trip Scheduling; and biannual refresher classes.

4. CTC requests MVRs for Contractor's drivers on a periodic basis. When a report shows evidence of violations, CTC will promptly notify Contractor and Taxi Section of Broward County's Division of Consumer Affairs. Contractor must have procedures to periodically review drivers' MVRs. Compliance is monitored by CTC staff. Per Contract “County may request and review State of Florida MVRs for Contractor's drivers on a monthly basis”.

5. Training program includes methods for measuring effectiveness of training in developing skill and improving performance. Methods shall be based on performance indicators which measure proficiency and not solely on Contractor meeting minimum training hours required. Such measurement procedure shall be provided to CTC upon request.

6. CTC performs annual evaluations of Contractors ensuring compliance with the
System Safety Program Plan, locally approved standards, FCTD and FDOT standards, annual operating data and insurance requirements.

7. CTC's direct involvement in day-to-day operations of service includes but is not limited to: on-street monitoring of drivers and vehicles, equipment and customer service inspections, contract compliance and quality control. Full cooperation is provided by Contractors CTC for monitoring programs. Contractors provide full access to all driver records at operating facilities. Contractors are required to make available: work station, desk, telephone and chair if so requested.

8. CTC's on-street monitoring shall include but is not limited to: on-time performance, knowledge of service area and routing, driver assistance, manifest accuracy and completeness, driver and vehicle appearance, wheelchair lift condition and operation, wheelchair securement systems and use, safety equipment, driving habits and compliance with Florida Motor Vehicle Regulations. Language from Contractor Service Agreement (See page 6, #3

9. Contractors provide CTC with service data via summary reports generated by CTMS and a bi-weekly invoice for each component of service for previous bi-weekly (Monday through Sunday) period. This information shall include but is not limited to the following: number of one-way passenger trips by type of trip; total hours of vehicle service; copies of daily reports for driver activity or other daily reports showing starting and ending times; starting and ending mileage for each vehicle; copies of trip tickets, log sheets or driver manifests; weekly reimbursement charges for services and denied trips requests.

10. CTC operates with zero trip denial rates. If one provider is unable to perform a requested trip due to capacity constraints another provider performs the trip.

11. Pursuant to Federal Transit Administration's (FTA) standards for precision, accuracy and accountability, CTC is required to report data to the National Transit Database (Section 15 data). As required by FTA, or CTC, Contractors shall collect Section 15 data and other "service supplied" information or "service consumed" information, as terms are defined in Section 15 of FTA regulations. Contractors are responsible for collection of financial and operational data, including on-board operational and passenger-related data and for transmittal to CTC on CTC approved forms as follows: operational and passenger-related data shall be submitted to CTC no less than weekly, financial data shall be submitted to CTC no less than quarterly and designated "service supplied" data shall be submitted to CTC thirty (30) days prior to termination of CTC's fiscal year. All source documents for Section 15 filings shall be subject to audit and shall be maintained by Contractors for five (5) years following final payment under their agreement with CTC.

12. Contractors must provide written monthly reports to CTC by the twentieth (20th) day of the month following the month of service. All required information shall be collected and reported individually for each funding component of service. Reports shall be submitted on a form developed by Contractor and approved by CTC and shall include, but not be limited to the following:

- Brief Narrative: Brief narrative highlighting month's activities, unusual events,
trends and other noteworthy observations.

- Ridership: Number of one-way passenger trips, PCAs and Companions on a day-by-day basis for each funding and fare entity and category.

- Miles and Hours: Total hours of service and vehicle miles on a day-by-day basis.

- Cost of Service: Total service revenue based upon contracted rates, collected fares and net revenue to provide service (total revenue less imputed fares).

- Service Quality Measures: On-time performance data, trips completed, missed trips and trip denials with an explanation.

- Efficiency Measures: Appropriate measures to include passengers per mile, hour or vehicle trip.

- Fleet Data: Updated fleet listings and status of all vehicles.

- Other: Accident/incident reports/briefs/findings, training activities/certifications, including sensitivity training and education, key personnel changes and suggested improvements.

13. All vehicles, wheelchair lifts or ramps and wheelchair securement devices are inspected annually by CTC staff. All vehicles must be approved, inspected and display an inspection sticker issued by CTC prior to providing service. Complaints received concerning any vehicle or its equipment, at CTC’s discretion, may require vehicle to report to CTC’s facility. If the complaint is related to safety issues, vehicle must report to the CTC immediately. Any vehicle found in violation of any contractual standard must be removed from service until violation is remedied.

14. CTC reserves the right through its agreements with Contractors, in its sole discretion, at any time, to inspect vehicles and maintenance facilities during normal working hours and to review Contractors’ maintenance records.

15. Day-to-day monitoring is also conducted through CTC’s Complaint Procedure. All client complaints shall be referred to CTC’s Paratransit Customer Service. Contractors shall not respond directly to a client who files a service complaint. CTC personnel may make initial contact with Contractors to obtain a verbal response and determine validity and resolution of the complaint. All complaints are entered into CTMS. Complaint will be forwarded to Contractor for written or electronic-response to CTC. Contractor’s responses shall be made within three (3) business days of receipt of complaint. Complaints of more serious nature such as injury, driver misconduct and client safety shall be responded to by the end of that business day. Complaints are tallied each month, indicating total number of complaints and type of complaints, for each Contractor. The complaint standard is established at 2.0 complaints per 1,000 trips per month.

16. CTC works closely with CTD’s Ombudsman Program to resolve all service complaints and inquiries. CTC investigates each item as described above (see
#15), contacts all concerned parties and sends CTD’s Ombudsman Program a report on the resolution of the complaint/inquiry.

COMPLIANCE WITH CHAPTER 427, F.S.

Review the TDSP to determine the utilization of school buses and public transportation services [Chapter 427.0155(4)]

“Approve and coordinate the utilization of school bus and public transportation services in accordance with the TDSP.”

HOW IS THE CTC USING SCHOOL BUSES IN THE COORDINATED SYSTEM?  N/A

School bus joint use program is not used in Broward County. Expense of liability insurance is a major concern raised by the School Board. In addition lack of seat belts and air conditioning on school buses is a problem for TOPS clients. However there is an agreement between Broward County Transit (BCT) and the School Board to provide emergency transportation services for residents to designated shelters in the event of a hurricane or other natural disaster. School Board services could be used for backup for assisted living facilities, mobile home parks and other congregate living sites.

Rule 41-2.012(5)(b): “As part of the Coordinator’s performance, the local Coordinating Board shall also set an annual percentage goal increase for the number of trips provided within the system for ridership on public transit, where applicable. In areas where the public transit is not being utilized, the local Coordinating Board shall set an annual percentage of the number of trips to be provided on public transit.”
BCT is dedicated to improving its fixed-route bus system on an ongoing basis and has completed the following improvements to enhance accessibility:

- Currently 3,517 bus stops are ADA compliant (280 bus stops cannot meet ADA requirements due to space/easement limitations) out of 4,189 bus stops which may be ADA accessible. There are ADA accessible bus stops on all routes.
- All bus drivers provide assistance upon request.
- All buses are equipped with voice annunciation systems which provide on-board automatic voice announcements in English, Spanish and Creole. They announce bus stops, major transfer points and safety advisories.
- All signage, both inside buses and at bus stops, complies with ADA regulations.

Clients requesting transportation services are directed to fixed-route service provided by BCT. Those unable to use fixed-route service are encouraged to apply for TOPS! paratransit service. Disabled clients who can use fixed-route bus service for some trips are granted ADA/TD conditional eligibility and use paratransit service only for trips where bus service is not accessible or navigable.

To help clients navigate fixed-route bus service, Paratransit Services offers a free Travel Training Program. A professional instructor provides personal and group lessons to teach riders how to use County buses. Paratransit eligible riders may call 954-357-7705 and make an appointment. During this reporting period 127 persons received travel training and 9 group travel training presentations were completed.

BCT provides service to 410 square miles within Broward County. BCT fixed-route buses connect with Palm Beach and Miami-Dade transit systems and Tri-Rail. BCT’s fleet has 315 fixed-route buses (all are handicap accessible) providing service on 72 weekday routes; 110 community buses operated in partnership with 18 municipalities; and Tri-Rail feeder shuttles. BCT transports 40.2 million passengers annually (110,137 daily) with an annual service mileage of 14.5 million miles. Seventy-two (72) routes receive service on weekdays thirty-nine (39) on Saturdays and thirty-five (35) on Sundays. There are 4,469 designated bus stops, 523 have shelters.

BCT provides service into Miami-Dade and Palm Beach Counties.

Fixed-route service into Palm Beach County includes Route 18 to Sandalfoot and Route 10 to Mizner Park.

Fixed-route service into Miami-Dade County includes Route 18 to 163rd Street Mall and Golden Glades Park, Route 2 to 207th Street and University Drive and Golden Glades Park Routes 1, 4 and 101 to Aventura Mall and 95-Express –from CB Smith Park to downtown Miami.

BCT provides free Wi-Fi on 441 and U.S. 1 Breeze routes and Broward Central Terminal. BCT operates seventeen (17) 40’ hybrid buses, five (5) articulated diesel buses and ten (10) hybrid articulated buses.

**Transit Technology**

Computer Aided Dispatch/Automatic Vehicle Locator (CAD/AVL)
This computerized bus tracking technology locates buses in service. It allows real time monitoring of bus movements, better control of bus headway, closer schedule adherence tracking and ability to direct maintenance crews faster in the event of vehicle breakdown or loss of communication. This technology allows BCT to improve dispatch efficiency and reliability of bus service. In addition, extensive information is collected for planning purposes.

**Status:** CAD/AVL uses cellular communications increasing the frequency of location reports from the bus and provides more reliable voice communications. BCT is currently installing CAD/AVL systems in fixed-route and community busses. Approximately forty (40) percent complete.

**Automatic Passenger Counters (APC)**
APCs count passengers when they board and exit buses. This technology enables BCT to develop or refine bus schedules and collect information for planning purposes. APCs reduce the cost of collecting ridership information. It increases the amount and quality of information obtained and permits continuous sampling of stop-by-stop ridership. APCs can be used to meet National Transit Database data reporting requirements for tracking ridership data, improving system on-time performance and to maximize operational efficiencies.

**Status:** Approximately seventy-eight (78) percent of fixed-route fleet is using this technology.

**Real Time Transit Information**
This technology provides better customer service by disseminating timely and accurate service information about projected bus arrival and departure times, disruptions and delays, transfers and other transportation services at select locations. It also provides customers other travel related information: date and time, weather, security related information, updates during emergencies and public service announcements. Access to information is provided through media including Passenger Advisory Signs (PAS), cable television, personal digital assistants, internet, telephones and dynamic message signs strategically located at bus shelters, transit centers, major office buildings and shopping centers. Riders use real time information to choose how they travel (bus, car or rail), which route and when. This technology ties into BCT’s primary function – to give the best customer service by helping travelers make efficient use of time while waiting for a bus. Knowing when a bus will arrive or depart helps reduce traveler anxiety.

**Status:** The CAD/AVL system enables BCT to disseminate and provide bus arrival and departure times, delays and other traveler related information to provide improved customer service. CAD/AVL project scope includes PASs at three (3) major transfer locations and sixty (60) major bus stops and real-time information delivered through Interactive Voice Response (IVR), website, email, text messaging and mobile phone apps.

**Traffic Signal Priority System (TSP)**
TSP is an ITS strategy providing buses preference at traffic signals when they arrive at intersections or under certain conditions. BCT expects this technology to reduce bus delays and maintain schedules with minimum impact on cross street traffic. TSP will improve mobility, reliability and efficiency.

**Status:** There is a joint project underway with FDOT and Broward County Traffic Engineering. BCT testing this technology with the traffic light system to determine its’ potential uses and benefits.

**Smart Cards**
Smart Cards are replacing magnetic stripe cards as the fare collection system of choice. Smart Cards look similar to credit cards and are equipped with a programmable memory chip that
performs several functions: holding instructions-value, self-monitoring and creating an electronic bill record. BCT is currently investigating Smart-Card technology, which allows more flexibility for payments to be accepted by several transit systems in the region using a variety of payment methods.

**Status:** New technologies and a wider array of payment methods are currently under review as testing of potential equipment is being performed. BCT issues photo identification cards for fixed-route users deemed eligible for reduced fare based on age and/or disability. Presenting the photo ID to bus drivers and/or bus pass vendors enables users to purchase reduced fare passes.

BCT Buz Pass is a credit-card size fare card with a magnetic swipe. It is a cost-savings pass for daily, unlimited travel for a specific period of time:

This section responds to a myriad of client inquiries and provides personal trip planning through the client information telephone center and Google Transit™ accessible on BCT’s web site. Improvements are ongoing at www.broward.org/bct. Its redesign and more user-friendly layout have resulted in continued increases of monthly visits. Enhancements include “Transit Flash,” a monthly e-newsletter sent to a client e-mail database with up-to-date information online bus pass purchasing and translation from English to Spanish and Creole.

**BCT RECEIVES $35.1 MILLION IN STIMULUS FUNDS**

Due to $35.1 million dollars received in stimulus funds as part of the American Recovery and Reinvestment Act of 2009, BCT is constructing a new operations and maintenance facility at Ravenswood, making bus stop/shelter enhancements and infrastructure improvements county-wide and implemented a centralized login system for fixed-route bus operations and installed real-time monitoring technology for all Paratransit vehicles.

$17.9 million dollars, is going to renovating the operations and maintenance facilities at Ravenswood which is currently at capacity and in need of upgrades to parking lot areas and maintenance buildings.

$15.6 million dollars is going to bus stop/shelter enhancements. Aside from improvements to meet ADA requirements the bus stop/shelter project includes adding street furniture, such as benches and trash receptacles; bike racks at selected locations; landscaping enhancements; transit signage; lighting; and real-time transit information incorporated when feasible and powered by solar energy. The project will impact 25 municipalities.

$1.6 million dollars was used by Paratransit Services to purchase ITS – AVL/GPS systems, Mobile Data Computers and IVRs for all vehicles. This system will prevent and detect fraud and has ability to obtain accurate, reliable and verifiable data for federal and state reporting requirements among other beneficial features.

Multimodalism is a trend in public transit geared to meet passengers’ needs for several methods of accessible and timely transportation. BCT participates in multimodalism with Bus Your Bike service allowing passengers to take bicycles on the bus as a secondary transportation option. Bicycles are transported on racks located on the front of all BCT fixed-route buses.
BCT has partnerships with Tri-Rail, Transportation Management Association (TMA) Community Buses. Using these different forms of transportation Broward County residents can assist in reducing traffic congestion and environmental pollution.

Tri-Rail is South Florida’s commuter train operated by South Florida Regional Transportation Authority (SFRTA), which runs along a 71-mile corridor parallel to Interstate 95 and services Palm Beach, Broward and Miami-Dade counties. Connecting wheelchair accessible bus service is available from all Tri-Rail stations and three (3) international airports: Miami International Airport, Fort Lauderdale/Hollywood International Airport and Palm Beach International Airport. Representatives from CTC and Planning Agency serve on the SFRTA ADA Advisory Committee.

Emergency Ride Home: Employees working in downtown Fort Lauderdale for an employer who is a TMA member and the employee participates in rideshare, walks or bicycles to work and has an emergency, TMA will provide a free ride home or emergency location.

**Planning – What are the coordinated plans for transporting the TD population?**

Coordinated plans for transporting the TD population are described in Broward County’s TDSP. The TDSP is updated annually by MPO and CTC and adherence to the plan is closely monitored. See TDSP Introduction and Service Analysis- to view the current TDSP plan visit http://www.browardmpo.org/programs/transportation-disadvantaged

**Public Information – How is public information distributed about transportation services in the community?**

Coordinated plans for transporting the TD population are described in Broward County’s TDSP. The TDSP is updated annually by MPO and CTC and adherence to the plan is closely monitored. **Certification – How are individual certifications and registrations coordinated for local TD transportation services?**

TD Trips - Pursuant to Chapter 427 Florida Statutes, Broward County as the CTC under direction from CTDand in cooperation with the LCB, developed local eligibility guidelines. CTC requires a written application for TD eligible clients, of whom there are currently 738 registered with TOPS! paratransit service. CTC and LCB have an established eligibility appeal process for clients. CTC, in cooperation with the LCB, established a seven (7) member review committee appointed by the LCB for TD eligibility appeals if so desired by the applicant. Applicant may request a review of the application by CTC program manager. TOPS! performs over 181,018 TD trips annually.

**Eligibility Records – What system is used to coordinate which individuals are eligible for special transportation services in the community?**

ADA: ADA Eligible Trips - BCT is responsible for providing complementary paratransit services under the Americans with Disabilities Act of 1990. Clients under this service are eligible based upon Federal ADA Rules and Regulations. There are currently 12,328 eligible ADA clients registered with TOPS! paratransit service.

ADA eligibility is determined by applicant’s functional limitations in demonstrating ability to use a fixed-route bus and/or navigate the fixed-route system. Applicants complete a written application. A physician of the applicant’s choice completes the medical section. Completed applications are reviewed by a third-party BCT-contracted medical functional assessment facility. Those applicants not receiving presumptive approval are sent for an assessment to determine appropriate service - ADA paratransit or fixed-route bus service. Assessments are conducted by a team of specifically trained professionals including physical and occupational therapists and comprise functional, cognitive, visual and respiratory evaluations. When determined applicant is not eligible for ADA paratransit service and fixed-route service is indicated, travel training is offered at no cost to applicant. Applicants who qualify and are enrolled in ADA paratransit service must apply for re-certification every three (3) years. CTC has established an eligibility appeals board that meets as needed. BCT’s Paratransit Services Section staff processed 4,879 applications for ADA and TD paratransit service this reporting period.

Comments: Biggest problem when hired call center for scheduling. The schedules do not have experience. They are not done by the computer is done. Leftover trips are manually entered. Need to have experienced people manually entering the trips. The system does 1.8 trips per hour.

   Solution: Need to have call center experience with scheduling and routing.
Provider Interviewer:

It was clear to me during my interview that Medex takes transporting passengers seriously and is committed to providing professional quality service. Also that the provider genuinely cares about the implementation of an effective and efficient system with manifest route planners (when the computer program cannot process all the info) who know the area and routes that make sense and serve both the passenger(s) and driver.

Summary Evaluation of On Site Observation TOPS

**Ghost Ride:**

Received automated call from TOPS after 9PM on 5/28. Did not receive an automated 8-12 minute “warning” call about arrival on 5/29/14. Driver was 4 minutes early. I was the first passenger of the day – in SW Broward off of Sheridan Street and next to I-75. Driver, Tony, was courteous and opened door etc. I sat in the “shotgun” seat of minivan. I learned he had been a driver for 7 years. While glove box labeled “fire extinguisher” was visible the contact # for TD Hotline was not visible unless I looked behind me intentionally trying to find it– personally I think it should be within view of any seat in vehicle. I could see from the manifest that we were on to Sunrise and then to Tamarac. Instead of taking I-75 to Sawgrass/Sunrise Blvd the driver took I-75 to 595 and exited at Pine Island to avoid the toll road since he shared that he could not take a toll road without approval. He then had to go west to his next pick-up. If he had a Sunpass he would have arrived at his destination more quickly. He picked up a passenger with a walker. She needed his assistance to enter the van because it was difficult for her to step into the vehicle due to the height of the step. The driver was patient, kind and helpful and made sure she had her seatbelt on. The ride was peaceful and pleasant. My only area of safety concern is that the driver did not wear a seatbelt. I arrived at my destination within 5 minutes of my requested arrival time. I was a passenger in the vehicle for 60 minutes which included the onboarding of 2 additional passengers.

Driver was Roland arrived 10 minutes before window. Had another passenger that was dropped before I was taken to my drop. Arrived at my drop by 11:30 AM.

Second trip to home arrived on time. Was told that we would go to Miami first. Tom called call center, and they could do nothing about it. He also called Paul Strobis and gave the information of the trip. This trip much longer than the first one. Arrived home about 2:30 PM. Person was picked up in Miami Gardens and taken to west Pembroke Pines before taking us home. added time to trip was about 40 minutes. I find this very inappropriate.
