1.0 UTILITIES SUMMARY

Due to the length of the study area, about 25 miles of University Drive, there are vast utilities located adjacent to University Drive. There are a total of 31 Utility Agency Owner's (UAO's) in the area. Table 1 illustrates the existing utility owner and contact information used in this study. A review of above-ground utilities was conducted in the project corridor. This review revealed power line crossings along University Drive at the following locations:

- South of Miramar Pkwy
- Pembroke Rd
- Pines Blvd
- Johnson St
- Taft St
- Sheridan St
- Davie Rd
- NW 33 St
- Stirling Rd
- Between Stirling Rd and Griffin Rd
- South of 39 St
- SW 30 St
- Between SW 30 St and Nova Drive
- Nova Drive
- Just South of I-595
- Peters Rd
- Broward Blvd
- NW 2 St
- Just South of NW 5 St
- Just North of NW 5 St
- Sunrise Blvd
- Between Sunrise Blvd and Sunset Strip
- Sunset Strip
- North of Middle River
- Oakland Park Blvd
- Springtree Drive
- NW 44 St
- NW 50 St

- NW 78 St

#

- NW 82 St
- Southgate Blvd
- North of Southgate Blvd
- Royal Palm Blvd
- NW 31 Ct
- Sample Rd

The power lines are generally supported on poles located outside of the University Drive Right of Way, except at crossing locations. Figure 1 displays the side of the corridor that the powerline poles are located. Utilities within the limits of the proposed improvements along University Drive and crossing streets have been located through a series of design tickets. Design tickets from 811, the federally-mandated “Call Before You Dig” campaign, were created on February 6th, 2013. It is recommended to contact each Utility Agency Owner in the design phase to mark up plans sheets and define specific locations of each utility along University Drive to coordinate potential utility conflicts.
